Phoenix

Summary

I am big fan of all things data, cloud and Artificial Intelligence.
Data Scientist, Architect and business leader by title and hands on practitioner by passion

15+ years of intense passion building data driven products for top financial customers

Experienced in building complex analytical pipelines, machine learning models for extremely complex business process, Petabyte scale data lake and high frequency/volume streaming analytics pipeline

I have been trusted adviser to senior level executive from business and technology, helping them with complex transformation in data and analytics space

Strong leader who effectively motivates and mentor directs and others

Why I am on LinkedIn?

All views in my post and article are personal unless otherwise stated.
No intentional harm intended to enterprise, humans or living things.

I am here to share my mind and knowledge working with real world data applications. I think of data, cloud, AI all the time during the day except when I am having caffeine.

I try to cover the relatively less talked about topic of data applications and try to highlight what worked for me and what did not. Use it at your personal risk.

Reach out to me via private message only if absolutely required (I get quiet a good number and finding it difficult to respond to all).
Use LinkedIn content search for my post and most of your questions might have been already answered via my posts or article.

Experience

Cognizant

6 years 6 months

Chief Architect

August 2016 - Present (4 years 1 month)

Principal Architect

March 2014 - July 2016 (2 years 5 months)
